Enrichment Programs - Summer Programs, Study Abroad, etc.

The Dallas area offers rich opportunities to learn about healthcare hands on: 13 major hospitals, hundreds of smaller practices, dozens of research venues, and a vibrant community of public health and community outreach programs.

Professional Experience

Working and observing in health settings is a critical aspect of pre-health education.

- **Virtual Shadowing** through [UT Southwestern](http://www.utsouthwestern.edu) and [Hearts for Health](http://www.heartsforhealth.com).
  
  “Does this count as ‘shadowing’?” YES, for the same reason that ‘telemedicine’ counts as ‘medicine.’

- **Jobs** and special learning opportunities posted to the [Pre-Health Mailing List](mailto:pre-health@utdallas.edu).

- **Volunteer** through [Student Organizations](http://www.utdallas.edu/studentorgs), [UT Dallas Service Learning](http://www.utdallas.edu/servicelearning), or the [Comet Cupboard](http://www.utdallas.edu/cometcupboard).

Summer Programs

Find a summer program or internship:

- [AAMC Database](http://www.aamc.org)
- [ExploreHealthCareers Database](http://www.explorecareers.com)
- [RIT List](http://www.rit-list.org)

Of special note to UT Dallas students:

- **Summer Medical and Dental Education Program (SMDEP)**
  - [Six-week Summer Academic Program](http://www.smdep.org) Free program for talented pre-med and pre-dent students completing their freshman or sophomore years of college. Offered at 12 sites around the nation. **Apply ASAP!**

- **Retina Foundation of the Southwest**
  - [Undergraduate and Post-Graduate research opportunities in ophthalmology](http://www.retinafoundation.org)

- **Texas A&M College of Dentistry**
  - [Summer Pre-Dental Enrichment Program (SPEP)](http://www.tamu.edu/dentistry/pre-dental/) - SPEP Collegiate II is a six-week summer program which provides college and post-college students an opportunity to:
    - prepare for and successfully take the DAT,
    - strengthen their academic science background,
    - learn more about the field of dental medicine,
    - broaden their interest in biomedical and clinical sciences,
    - learn useful study patterns for professional study,
    - increase their competitiveness for admission to dental school, and
• enhance their success once admitted to dental school.
